

LUMALIGHT BY spectrahue™

Spectrahue inspires spiritual wisdom and a universal connection among people.

UNLOCKING THE BODY'S SELF-HEALING POWER

LUMALIGHT YOUR WAY TO A BRIGHTER FUTURE

Color and light therapies have been embraced by the holistic mind and spiritual seekers in western culture for over a century, and is gaining popularity in a wide spectrum of professional sectors.

Spectrahue Color Harmonics System is a spiritual-science modality inspired by Lumalight developer, Julianne Bien in the 90s. It is a holistic approach to understanding and working with our holographic, energetic make-up. This is achieved through educational books and training programs for Lumalight use.

Lumalight by Spectrahue™ is a proprietary light set that amplifies color light applications. Combined with its sacred geometry module, it is described as color harmonics. Lumalight continues to evolve and gain acceptance in spas and wellness practices such as acupuncture, bodywork, sound and aroma therapies.

Lumalight color harmonics tools are designed for the novice to advanced practitioner to light the way for a greater awareness of the inner self.

ANCIENT ROOTS FOR MODERN SCIENCE

Let's journey back in time... at the speed of light, of course. Color light beams, used as a therapy, has existed and evolved throughout history. The ancient Egyptians used light and prisms to heal people. Heliotherapy, the act of curing sickness by sun exposure, was born in ancient Greece.

LIGHT IS INDISPENSABLE

Let's flash forward to early 20th century. In a period that sees more medical advances than all of the previous centuries combined, new knowledge of the healing potential of color light emerges.

ENERGY MEDICINE ON THE RISE

In 1922, Albert Einstein received his Nobel Prize for his explanation of the photoelectric effect, the particle/wave theory. However, it was biophysicist Fritz-Albert Popp in 1974 that proved that all living organisms emit light at the cellular level, and that all

organic life absorbs light, processes it, and transmits it coherently. Our bodies are virtual electro-magnetic fields, and our skin is like a two-way antenna. We are continuously affected by the universal energy around us. Subsequent research shows that this communication network may influence our internal processes.

Dr. Valerie Hunt of UCLA demonstrates that the body's energetic emissions in the aura exhibit chaotic changes just before pathological conditions in the tissue are detected. This helps support the main postulate of color light therapy: ailments begin as energetic disharmonies, which, if detected in time, may be addressed through non-invasive means and life style changes.

FOLLOWING NATURAL PATHWAYS

Since the advancement of these theories, color light is being explored as a holistic approach to wellness. We live in a chromatic world, in which our emotional, physical, and spiritual state is influenced by the energy carried in light. Spectrahue color harmonics can support most holistic programs to encourage an individual's innate ability to self heal, regulate and maintain proper energy flow in the meridians, which influences us on many levels.

ENERGY RESEARCH TODAY

Today, the field of vital energies is drawing interest from even traditional thinkers. This non-diagnostic and non LED laser use of light and color is finding widespread acceptance among alternative and integrative medicine practitioners in wellness sectors as well as psychologists, chiropractors,

acupuncturists, massage therapists, and estheticians. In psychiatry, research has identified light therapy as an effective treatment for seasonal affective disorder (SAD). Using specific colors may also be beneficial to raise, calm, balance and clear energies that influence our aura.

REARRANGE OUR ENERGY

Spectrahue color harmonics use may be beneficial in a professional setting, but it can also be embraced into your spiritual regime.

Lumalight sessions are a complete mind/body and spiritual experience as we are holographic in nature. To introduce crystal colors and sacred geometry into our lives is a heartfelt approach for nourishing the soul. It is the perfect complement to all vibrational therapies that focus on influencing the energy field (aura).

THE SPECTRAHUE EDGE

Lumalight color brilliance is achieved through crystal quality filters. Our ergonomic-design penlights deliver color energy paired with sacred geometry, using its filter attachment design. Its superior finish allows for use in specialty practices. There are 64 interchangeable color and geometry components. Lumalight continuously evolves with advanced teachings in workshop format based on the published books by its developer. All Lumalight systems include educational material and customer support. POWER OF THE RAINBOW

Color is energy and also source information that guides our emotions. Millions of shades of color make up our rainbow spectrum, each being a vibration and frequency with the ability to nourish us in many ways, such as sun ripe fruits and vegetables. And the geometry patterns in Lumalight sets shape the intent of this vital energy as the penlight is shone into the aura. We experience a range of emotions throughout our lives. Color light can influence these feelings and gently guide us in a new direction as our soul strives for self love, harmony and balance. As with all energy-based modalities, it is a personal journey and a process of self discoveries.
